FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

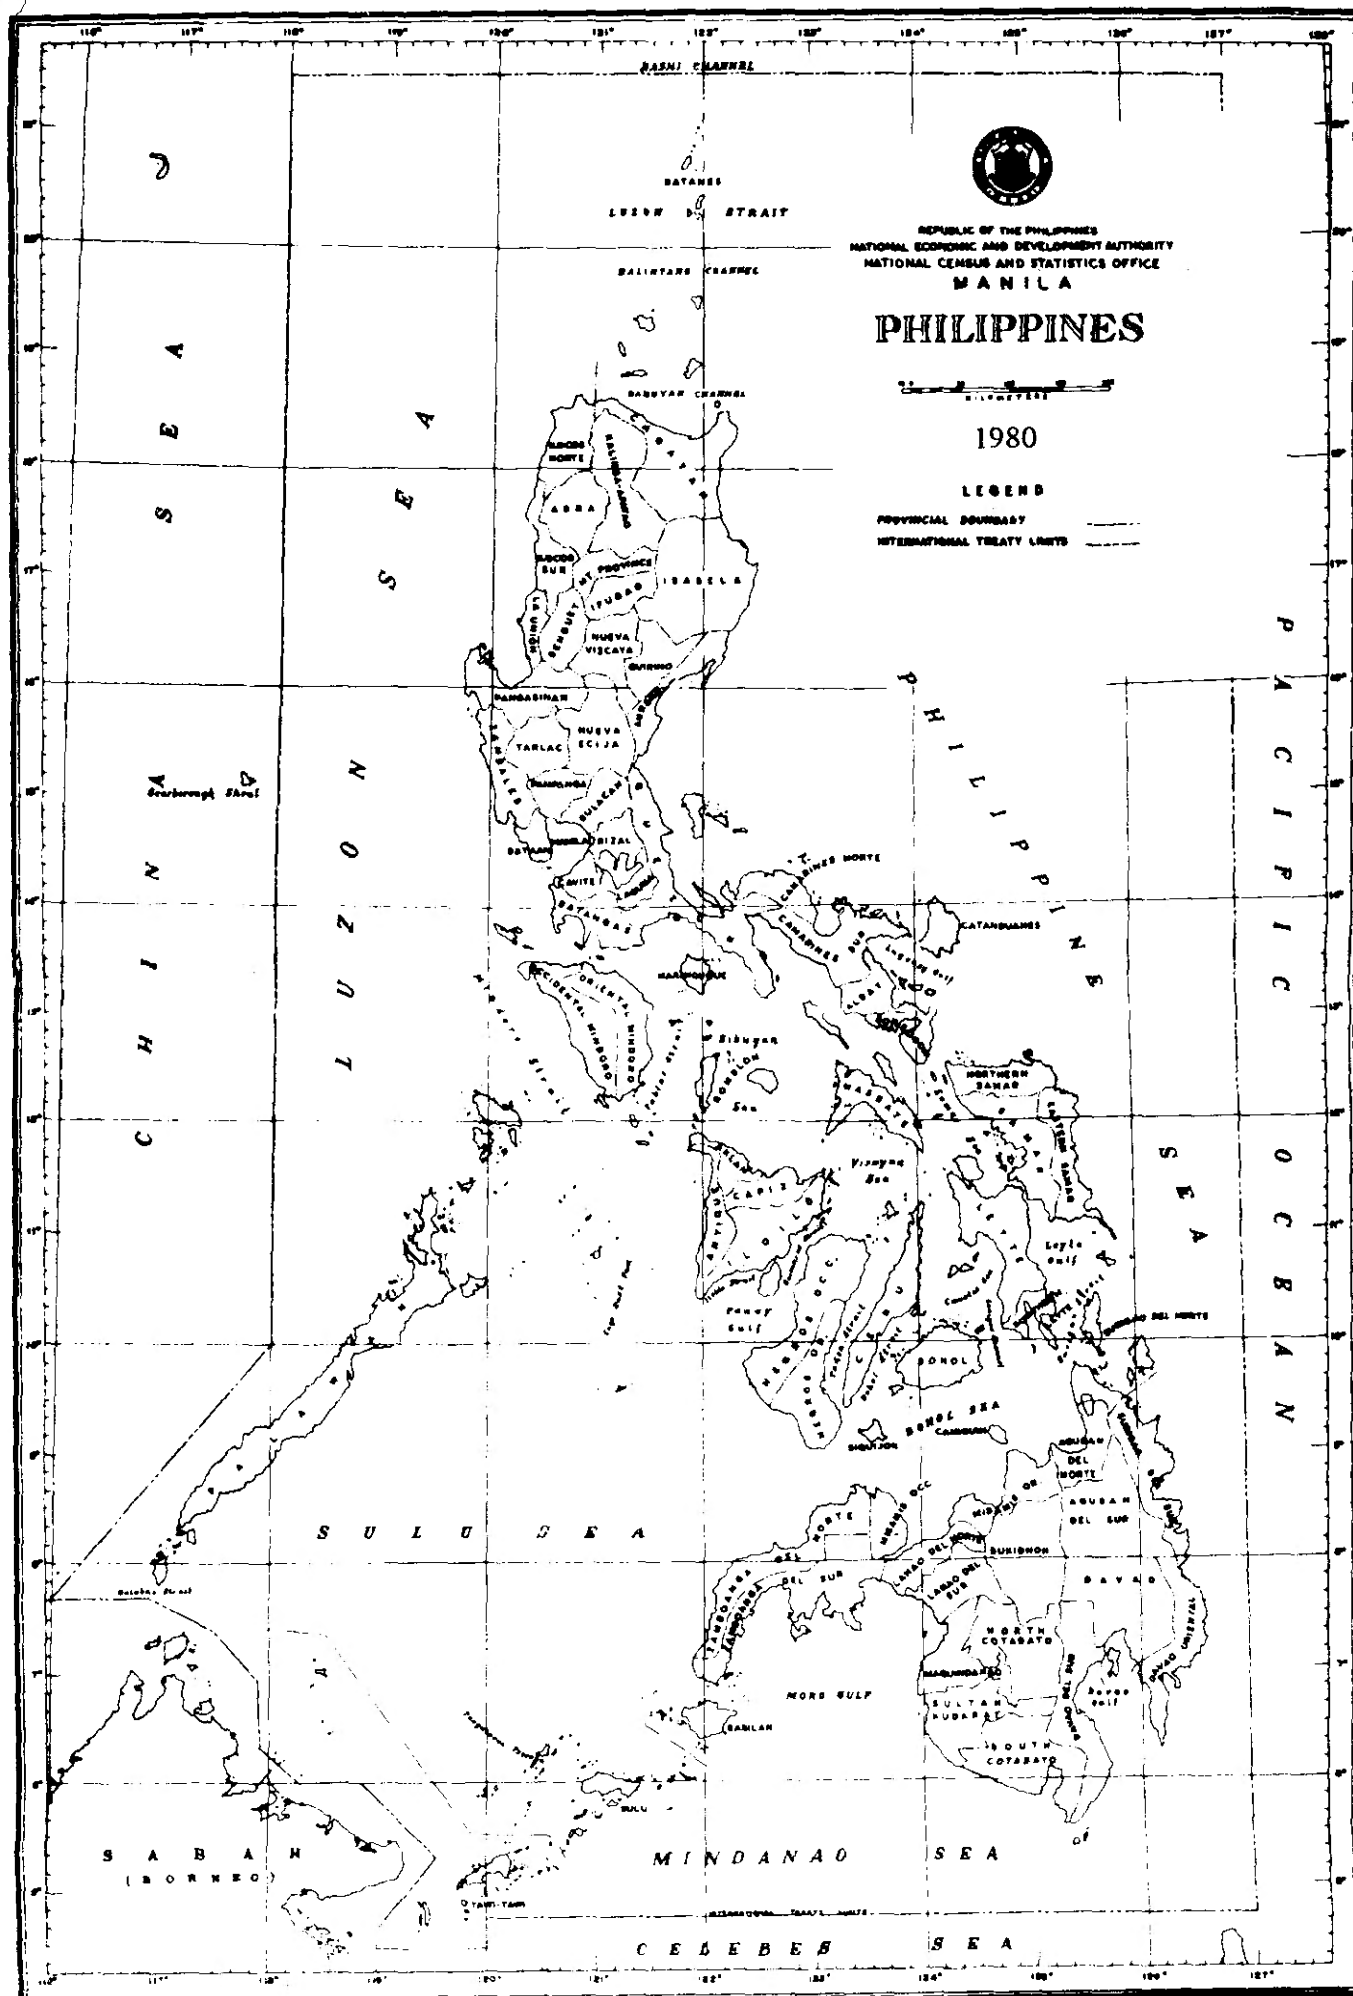

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Explanatory Text

GENERAL

INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

AUTHORITY FOR THE 1980 CENSUS

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

EXPLANATORY TEXT

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

CENSUS ORGANIZATION

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

EXPLANATORY TEXT

POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

DEFINITION OF TERMS AND CONCEPTS

I – POPULATION

BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - 1) A town hall, church or chapel with religious services at least once a month;
 - 2) A public plaza, park or cemetery;
 - 3) A market place or building where trading activities are carried on at least once a week;
 - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
 - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

EXPLANATORY TEXT

- or within one year, if abroad;
 - b. students who usually go home to their respective households at least once a week;
 - c. persons working elsewhere who usually go home to their respective households at least once a week;
 - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
 - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
 - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
 - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
 7. Persons found in the household who have no usual place of residence elsewhere;
 8. Persons found in the household who are not certain of being enumerated elsewhere;
 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

EXPLANATORY TEXT

PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

EXPLANATORY TEXT

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

HEAD OF HOUSEHOLD

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

EXPLANATORY TEXT

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are *examples*.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under “Others”.

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as “married” includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

USUAL OCCUPATION

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

INDUSTRY

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

II – HOUSING

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. **Single house** – a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. **Duplex** – a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. **Apartment/accesoria/condominium/row house**

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. **Improvised (barong-barong)** – a makeshift or roughly constructed house usually built with salvaged materials.
5. **Commercial/industrial/agricultural** – buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial – a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial – a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural – any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. **Other housing unit (natural shelter, boat, etc.)**

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. **Hotel, lodging house, dormitory, etc.** – This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. **Institutional (hospital/convent/school dormitory/penal institution, etc.)** – a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. **Other collective living quarters** – any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

EXPLANATORY TEXT

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

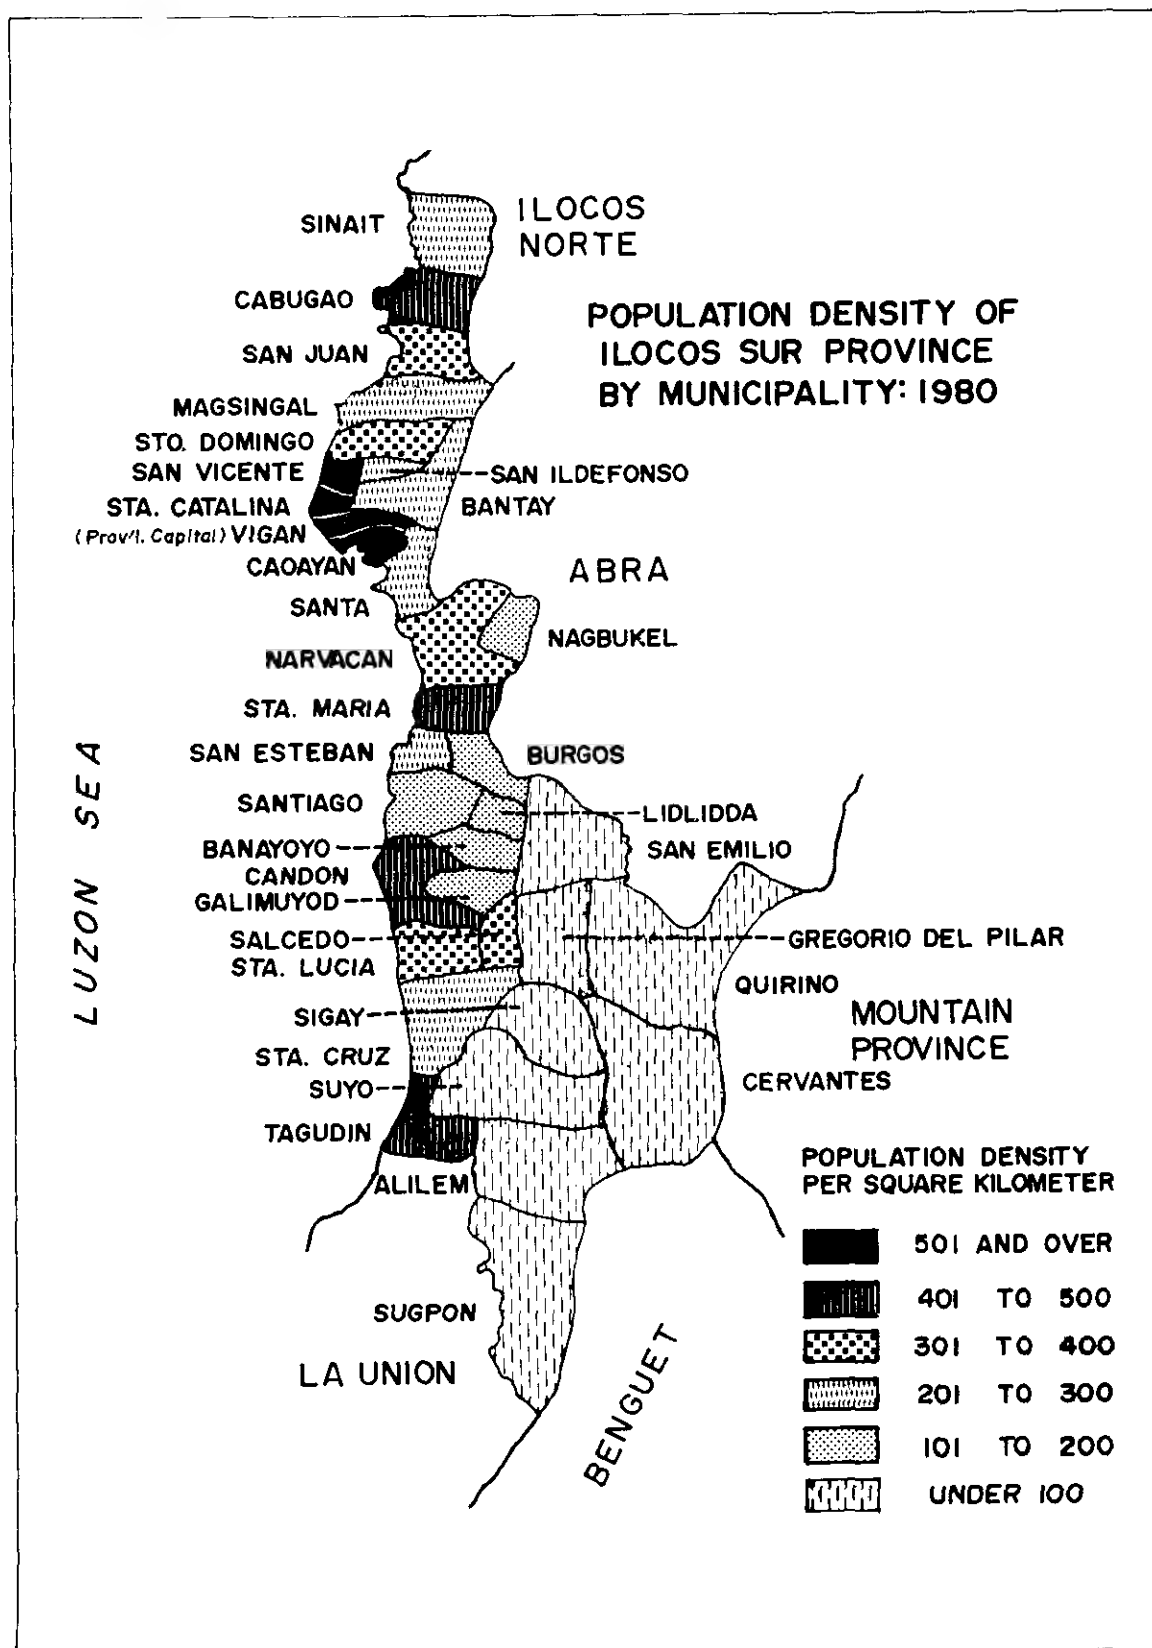

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

EXPLANATORY TEXT

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Area of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway was excluded in determining the floor area.

A BRIEF ANALYSIS

Table 2 provides an insight of the distribution of the population by age group. As observed, a pyramid-like structure forms in the graph with a broader base of males and females below five years old and gradually declining as the population becomes older. This pattern is likewise observed in the rural areas where both the male and female population has a decreasing pattern as the persons grow older. On the other hand, varying patterns are noted for both urban males and females (see also Figure 1).

AGE COMPOSITION

Persons in the younger age group (0-14 years) showed a steady decline over the last 10 years. From 41.69 percent of the total population in 1970, its corresponding proportion went down to 39.60 percent in 1975, decreasing further to 38.24 percent in 1980. The productive age group (15-64 years) on the other hand, slightly increased from 54.16 percent in 1975 to 54.21 percent in 1980. In contrast to the young and productive age groups, the older age group (65 years and over) shows an up and down trend. After decelerating by 0.13 percentage point between 1970 (6.37%) and 1975 (6.24%), it increased by 1.31 percentage points to 7.55 percent. Of the urban population, 36.48 percent belong to the younger age group; 54.74 percent, to the productive age group and 8.78 percent, to the older age group. In the rural areas, however, the proportion of the youth population is higher at 38.62 percent, correspondingly, the proportion of persons in the productive age group is 54.09 percent and in the older age group, 7.29 percent.

The population of Ilocos Sur is getting "older" according to a more recent record. The median age of the province was 19 years in 1975 and moved up to 20 years, thus gaining a year between 1975 and 1980.

Table B shows the age composition of the population in the three censal years:

**TABLE B – AGE COMPOSITION OF THE POPULATION,
ILOCOS SUR: 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>443,591</u>	<u>100.00</u>	<u>419,776</u>	<u>100.00</u>	<u>385,139</u>	<u>100.00</u>
0 – 14 years	169,638	38.24	166,212	39.60	160,558	41.69
15 – 64 years	240,449	54.21	227,360	54.16	200,043	51.94
65 years and over	33,504	7.55	26,204	6.24	24,538	6.37

With an increased percentage of persons in the productive age group, the dependency ratio declined from 84.63 to 84.48 or a decrease of 0.15 dependents over the 1975 ratio. Rural dependency ratio was markedly higher than the urban ratio, 84.88 for the former and 82.68 for the latter.

A BRIEF ANALYSIS

MARITAL STATUS

The proportion of never married individuals dropped abruptly by 3.56 percentage points from 48.92 percent in 1975 to 45.36 percent of the total population 10 years old and over. More than four-fifths of the total unmarried individuals (80.43%) were rural dwellers, while 19.57 percent were urban residents. Married individuals showed an up and down trend, from 46.02 percent in 1970 to 45.57 percent in 1975, and 48.29 percent in 1980. A great percentage of the married group came from the rural areas with 83.13 percent compared to 16.87 percent from urban areas. About 0.72 percentage point had been added to the 1975 proportion of widowed persons as they aggregated 5.93 percent. The proportion of divorced or separated persons went up from 0.26 percent to 0.34 percent and those with unknown or not stated marital status, from 0.04 percent to 0.08 percent.

**TABLE C – POPULATION 10 YEARS OLD AND OVER BY SEX AND
MARITAL STATUS, ILOCOS SUR: 1970, 1975 AND 1980**

Sex and Marital Status	1980		1975		1970

Divorced/separated	774	0.45	538	0.34	581	0.40
Not stated	190	0.11	93	0.06	173	0.12

A BRIEF ANALYSIS

The proportion of never married males also followed an up and down trend of 49.21 percent in 1970, 51.73 percent in 1975 and 47.44 percent in 1980. On the other hand, the proportion of never married women dropped from 46.23 percent to 43.44 percent. About 0.19 percent of the women and 0.13 percent of the men aged 10-14 plunged into early marriages. The proportion of widowed males and females increased respectively to 3.02 percent and 8.61 percent. Divorced/separated men constitute only 0.23 percent, while their female counterparts rose slightly from 0.34 percent in 1975 to 0.45 percent. The proportion of persons with unknown status was slightly higher among the females (0.11%) than among the males (0.05%).

**FIG. 2 – MARITAL STATUS OF THE POPULATION
10 YEARS OLD AND OVER BY SEX,
ILOCOS SUR: 1980**

A BRIEF ANALYSIS

HIGHEST GRADE COMPLETED

The desire for higher learning is observed in the province as evidenced by the increased proportion of the private household population 7 years old and over who reached the secondary and college levels as well as those who earned academic degrees.

Compared to 1975, persons who completed at least a year in high school increased from 18.58 percent to 21.41 percent; college undergraduates similarly increased from 4.97 percent to 6.54 percent and academic degree holders, from 2.90 percent to 3.99 percent. In spite of retaining the big lead of 58.42 percent, elementary schoolers declined by 3.62 percentage points. The proportion of unschooled persons, likewise, went down by 1.11 percentage points, while those whose educational attainment were not stated dropped from 1.26 to 0.50 percent.

Females comprise the majority of academic degree holders (64.62%), persons with at least a year of college training (51.66%) and elementary schoolers (51.22%). The corresponding shares of males were: 35.38 percent, 48.34 percent and 48.78 percent. On the other hand, males outnumbered the females who had reached the secondary level (53.81% males, 46.19% females).

Out of the 211,397 persons with elementary schooling, 31.07 percent finished anywhere from the first to the third grade; 19.51 percent completed fourth grade; 12.51 percent, fifth grade; and 36.91 percent made it through the sixth or seventh grade. Of those who reached the secondary level, 60.05 percent finished only the lower years, while the rest went through fourth year. Only 16.12 percent of the college undergraduates attended fourth year or higher; 83.88 percent completed anywhere from first year to third year college.

The following table shows the distribution of the private household population 7 years old and over by highest grade completed in the last two censal years:

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD
AND OVER BY HIGHEST GRADE COMPLETED,
ILOCOS SUR: 1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>361,836</u>	<u>100.00</u>	<u>341,963</u>	<u>100.00</u>
No grade completed	33,074	9.14	35,048	10.25
Elementary	211,397	58.42	212,160	62.04
High school	77,484	21.41	63,528	18.58
College undergraduate	23,650	6.54	16,996	4.97
Academic degree holder	14,437	3.99	9,915	2.90
Not stated	1,794	0.50	4,316	1.26

A BRIEF ANALYSIS

FIG. 3 – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER
BY HIGHEST GRADE COMPLETED, ILOCOS SUR: 1980

LITERACY

The untiring effort of the government in providing opportunities for formal education all over the country has paid off. As a result, Ilocos Sur's literacy rate gained 3.63 percentage points over the last ten years, from 80.70 percent in 1970 to 84.33 percent in 1980. The higher proportion of literates in urban areas (91.61%) may be attributed to the accessibility of more schools, compared to rural areas (82.72%).

The overall male literacy rate of 86.66 percent was higher than the females' 82.18 percent. The literacy rate of male urban residents considerably exceeded that of the females with 93.81 percent for the former and 89.80 percent for the latter. A similar pattern was noted in the rural areas where the males recorded an 85.19 percent literacy rate compared with the females' 80.39 percent.

A BRIEF ANALYSIS

**FIG. 4 – PERCENTAGE LITERACY OF PRIVATE HOUSEHOLD POPULATION
10 YEARS OLD AND OVER BY SEX, URBAN-RURAL, ILOCOS SUR: 1980**

LANGUAGE OR DIALECT

Twenty languages and dialects were reported spoken in the 32 municipalities and 2 municipal districts of the province, but despite this wide array, Ilocano retained its impressive lead over all the others. In six municipalities – Galimuyod, Lidlidda, Nagbukel, San Esteban, San Ildefonso and Sigay – no other dialect was reported except Ilocano. In 11 other municipalities, Ilocano is generally spoken by over 99 percent of the respective households.

Of the 83,614 private households, 80,831 or 96.67 percent speak Ilocano. Kangkanai is reported by only 2.41 percent; Tagalog, by 0.65 percent and all the other dialects combined, by 0.27 percent (Table 7).

A BRIEF ANALYSIS

GAINFUL OCCUPATION

Forty-five percent more or less, of the household population 15 years old and over are engaged in gainful occupations. As may be expected, the biggest group of gainful workers are agricultural, animal husbandry and forestry workers, fishermen and hunters, registering 62.12 percent of the total gainful workers. Production and related workers, transport equipment operators and laborers, constituting 15.46 percent, trailed far behind (Table 8).

While the agricultural group has always topped the list, the latest figure is lower by 1.06 percentage points as compared to 1975 (63.18%). Production and related workers, likewise, slid down to 15.46 percent from 17.98 percent in 1975. Also on the downtrend are sales workers and the prestigious group of administrative, executive and managerial workers, the share of the former having gone down from 5.45 percent in 1975 to 4.36 percent, and the latter, from 0.44 percent to 0.24 percent. In contrast, professional, technical and related workers moved up to 6.72 percent from 5.20 percent in 1975. Service workers with 4.86 percent share also gained 0.27 percentage point over 1975 while clerical and related workers was up from 2.25 percent to 2.80 percent. Workers not classifiable by occupation, on the other hand, grew from 0.91 percent to 3.44 percent in the last census.

Shown below are comparative figures on the proportion of workers engaged in various gainful occupations in 1975 and 1980:

**TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR
OCCUPATION GROUP, ILOCOS SUR: 1975 AND 1980**

Major Occupation Group	1980		1975	
	Number	Percent	Number	Percent
Total	<u>127,387</u>	<u>100.00</u>	<u>118,918</u>	<u>100.00</u>
Professional, technical and related workers	8,565	6.72	6,180	5.20
Administrative, executive and managerial workers	302	0.24	521	0.44
Clerical and related workers	3,572	2.80	2,672	2.25
Sales workers	5,559	4.36	6,487	5.45
Service workers	6,184	4.86	5,456	4.59
Agricultural, animal husbandry and forestry workers, fishermen and hunters	79,128	62.12	75,136	63.18
Production and related workers, transport equipment operators and laborers	19,698	15.46	21,378	17.98
Workers not classifiable by occupation	4,379	3.44	1,088	0.91

A BRIEF ANALYSIS

INDUSTRY

Agriculture, fishery and forestry prevail as the dominant industry group in Ilocos Sur with 65.16 percent of the total gainful workers. Agricultural crop producers chiefly comprise this group (88.92%) with only 9.14 percent in fishery and 0.99 percent in the production of livestock, poultry and other animals. About 12.89 percent are into community, social and personal services, which provide three main sources of jobs such as education services (36.01%), personal and household services (31.25%) and public administration and defense (18.18%). Manufacturing employs no more than 7.08 percent, with the manufacture of textile, wearing apparel and leather (60.12%) and of food, beverages and tobacco (13.86%) as the workers' principal concentrations.

A BRIEF ANALYSIS

Wholesale and retail trade make up 4.28 percent; transportation, storage and communication, 3.93 percent; construction, 3.46 percent and financing, insurance, real estate and business services, 1.43 percent. The respective contributions of two industry groups – electricity, gas and water (0.26%) and mining and quarrying (0.15%) – are very insignificant. Around 1.36 percent are reported in activities not adequately defined (Table 9).

MIGRATION

Most of the populace (97.53%) aged 5 years and over resided in the same city/municipality where they had lived on May 1, 1975. Approximately 1.17 percent were living in another city/municipality within Ilocos Sur (intra-provincial migrants) while 1.10 percent were residing in another province (inter-provincial migrants). Only a few were residents of foreign countries (0.20%). The females predominated over the males both in terms of intra-provincial (0.69% females; 0.48% males), and inter-provincial migration (0.64% females; 0.46% males).

A BRIEF ANALYSIS

TYPE OF BUILDING

A large majority (98.81%) of the private households are occupying single houses. The remaining 1.19 percent live in other types of structures, namely: duplex, 0.33 percent; apartment/accesoria/condominium/row house/etc., 0.16 percent; improvised such as barong-barong, 0.46 percent; commercial/industrial/agricultural buildings, 0.17 percent and other living quarters, 0.07 percent.

The comparative table that follows presents a picture of the housing conditions in Ilocos Sur during the two censal years 1970 and 1980:

**TABLE F – NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, ILOCOS SUR: 1970 AND 1980**

Type of Building	1980		1970	
	Number	Percent	Number	Percent
Total	83,614	100.00	68,984	100.00
Single house	82,623	98.81	67,416	97.73
Duplex	273	0.33	621	0.90
Apartment/accesoria/condominium/row house/etc.	132	0.16	134	0.19
Improvised (barong-barong)	381	0.46	623	0.90
Commercial/industrial/agricultural	145	0.17	176	0.26
Other housing unit: natural shelter, boat, etc.	40	0.05	—	—
Hotel, lodging house, dormitory, etc.	10	0.01	—	—
Institutional (hospital, convent, school dormitory, etc.)	10	0.01	14	0.02
Other collective living quarters (military camp, etc.)	—	—	—	—

A closer examination of the comparative data in Table 1 reveals that a greater proportion of households living in apartment/accesoria/condominium/row house/etc. (92.42%) are in the urban areas and merely 7.58 percent in the rural areas. Nearly three-fourths (72.41%) of the households occupying commercial/industrial/agricultural buildings are urban dwellers, compared to only 27.59 percent rural dwellers. Likewise, households occupying institutional buildings such as hospital, convent, school dormitory and other similar structures are entirely in the urban areas.

In contrast, most of the households living in single houses (82.89%) and in duplex (77.66%) are found in the rural areas; only 17.11 percent and 22.34 percent of the respective structures are located in the urban areas. Two-thirds, or 66.67 percent of those living in improvised structures (barong-barong) are rural dwellers while 33.33 percent are

A BRIEF ANALYSIS

urban residents. Households occupying hotel, lodging house, dormitory, etc. are equally distributed in the urban and the rural areas. Meanwhile, those living in other housing units such as natural shelter, boat, etc. are entirely rural households.

It is interesting to note that housing conditions in Ilocos Sur have greatly improved during the past 10 years. Of the 68,984 households in 1970, 97.73 percent lived in single houses and 0.90 percent in improvised structures. In 1980, occupants of improvised structures slid down to 0.46 percent of the total households, thus the relative value of single house dwellers went up to 98.81 percent.

TYPE OF OCCUPANCY

Of the total number of households, 78,684 or 94.11 percent are owners of their dwelling units. The rest of the households are broken down as follows: 2.02 percent, tenant/lessee; 0.08 percent, subtenant/sublessee and 3.79 percent, rent-free occupants.

Around 83.56 percent of the owners are in rural areas and only 16.44 percent, in urban areas (Table 1).

CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Of the total number of households, 58,889 or 70.43 percent occupy dwelling units built with roof of strong materials (galvanized iron, tile/concrete/brick/stone and asbestos) and 24,725 or 29.57 percent, with roof of light materials (cogon/nipa, makeshift/salvaged materials, and other such as anahaw). Households found in structures with roof of strong materials constitute 81.14 percent in the urban and 68.17 percent in the rural areas. Those with roof of light materials make up 18.86 percent in the former and 31.83 percent in the latter.

By type of construction materials of outer walls, 55.59 percent of the households occupy dwelling units constructed with outer walls of strong materials (galvanized iron/aluminum, tile/concrete/brick/stone, wood/plywood, etc.) and 44.41 percent, of light materials (bamboo/sawali, cogon/nipa, etc.). Nearly three-fourths (73.21%) of the households in the urban areas are in dwelling units with outer walls of strong materials and more than one-fourth (26.79%), with light materials. In the rural areas, likewise, a higher percentage have outer walls of strong materials (51.87%) than of light materials (48.13%).

YEAR BUILT

As seen in Table 2, more than one-fifth (23.35%) of the total households dwell in structures built during 1976-1980; 20.24 percent, in 1971-1975; 25.30 percent, during 1961-1970 and 18.09 percent, in 1951-1960. The rest (13.02%) are in structures built 30 or more years ago.

FLOOR AREA OF DWELLING UNIT

More than half (53.31%) of the total households live in dwelling units with floor area of less than 30 square meters; 32.70 percent, 30-49 square meters; 7.06 percent, 50-69 square meters and 4.05 percent, 70-99 square meters. Only 2.88 percent have spacious dwelling units with an area of 100 square meters and over (Table 3).

A BRIEF ANALYSIS

TENURE OF OWNER- OCCUPANT WITH RESPECT TO THE LAND

Of the 78,684 owner-occupants, 87.10 percent also own the land where the structure is erected. The remaining 12.90 percent are distributed as follows: 3.35 percent, lessee or sublessee; 3.33 percent, farm lessee/agricultural tenant of landowner; 3.05 percent, other legal tenure and 3.17 percent, no tenure such as squatters, etc. (Table 4).

SOURCE AND USE OF WATER SUPPLY

Census results show that the tubed/piped deep well is a common source of water supply for most households in Ilocos Sur, whether for drinking (30.47% of the total households) or for kitchen use (28.61%). For laundry purposes, one-fourth, or 25.06 percent depend on the same source. On the other hand, water from tubed/piped shallow well is used by 29.47 percent for drinking; 27.82 percent, for kitchen use and 26.25 percent, for washing clothes. One-fifth (20.02%) rely on the faucet, community water system as their source of drinking water; 18.71 percent utilize it for kitchen use and 15.42 percent, for laundering clothes. While a smaller percentage rely on the dug well for drinking water (15.52%), 20.36 percent depend on it for kitchen use and 22.08 percent, for washing clothes. A few households use spring water – 4.26 percent, 4.19 percent and 2.91 percent for each of the respective categories – while 8.23 percent depend on lakes, rivers, streams, etc. for washing clothes (Table 6).

KIND OF LIGHTING FACILITIES

Although kerosene is still widely used for lighting, the proportion of households using it decreased significantly from 94.64 percent in 1970 to 53.96 percent ten years after. In contrast, 44.01 percent of the households use electricity, compared to 4.47 percent in 1970. Liquefied petroleum gas (LPG) is used by 1.41 percent while less than one percent use oil and other kinds.

Today majority of the urban households prefer electricity (74.37%) to any other kind of lighting facility. Almost one-fourth (24.79%) use kerosene and 0.81 percent, liquefied petroleum gas. In 1970, 78.36 percent of the urban households used kerosene and 20.73 percent, electricity. In the rural areas, the proportion of kerosene users is still higher than consumers of electricity (60.11% against 37.60%). Compared to 1970, however, rural households using kerosene dropped from 97.74 percent to 60.11 percent while those using electricity went up to 37.60 percent from 1.38 percent. More rural (1.54%) than urban households (0.81%) use liquefied petroleum gas. In both urban and rural areas, a negligible proportion of households use oil and other lighting facilities (Table 5).

COOKING FUEL

As shown in Table 8, wood or charcoal stands out as the most common type of cooking fuel in the province, with 83.81 percent of the households using it. The rest use liquefied petroleum gas (9.53%), kerosene (4.44%), electricity (1.57%), and other kinds (0.65%). Wood/charcoal is used by 91.70 percent of the households in 1970; kerosene, by 4.44 percent; LPG, by 3.59 percent and electricity, by merely 0.09 percent.

The predominant use of wood or charcoal is evident in both urban and rural areas – 68.60 percent for the former and 87.02 percent for the latter. The use of liquefied petroleum gas is proportionately higher among urban households (24.90%) compared to 6.29 percent of the rural households. A similar pattern was noted in 1970, with the proportion

A BRIEF ANALYSIS

of households using wood or charcoal higher in the rural (94.82%) than in the urban areas (75.48%). Similarly the proportion of households using kerosene (12.34%) and LPG (11.77%) was higher in the urban than in the rural areas with only 2.93 percent for kerosene and 2.04 percent for LPG.

TOILET FACILITIES

Half of the households (50.60%) in Ilocos Sur use water-sealed toilet facilities with depository other than sewer/septic tank. Around 31.91 percent use water-sealed toilet with sewer/septic tank; 8.07 percent, closed pit (antipolo, etc.); 5.13 percent, open pit and 0.56 percent, other (pail system, etc.). Only 3.73 percent of the households are without toilet facilities.

Census results further reveal that rural households are no longer much behind their urban counterparts as far as health practices are concerned. The water-sealed toilet with other depository is common among the urban (46.29%) as well as the rural households (51.51%). The proportion of households using the water-sealed toilet with sewer/septic tank is higher among the former (43.99%) than among the latter (29.36%). A few use the closed pit, with 4.32 percent in the urban and 8.87 percent in the rural areas. However, more households in the rural areas use the open pit — 5.83 percent against 1.81 percent in the urban areas. In both the urban and the rural areas other types of toilet facilities are seldom used (0.10% and 0.65%, respectively). Households without toilet facilities comprise 3.49 percent in the former and 3.78 percent in the latter areas.

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Out of 83,614 households in Ilocos Sur, 54,397 or 65.06 percent own radios. A small percentage of the households own television sets (11.89%) and refrigerators or freezers (9.09%).

Table 9 shows that owning a radio is very common in both urban and rural households (73.50% and 63.28%, respectively). A greater number of urban households also own television sets (28.77%) and refrigerators or freezers (22.35%). In comparison, only 8.32 percent of the rural households have television sets and 6.29 percent, refrigerators or freezers.

In the 1970 census, 55.88 percent owned radios; only 0.68 percent had television sets and 1.30 percent, refrigerators or freezers. Radios were also common in both areas — 67.81 percent in the urban and 53.61 percent in rural areas. Ownership of television sets (3.04%) and refrigerators or freezers (5.23%) was, likewise, higher among urban households with only a few of the rural households enjoying such appliances (0.23% and 0.56%, respectively).
